

## CALL FOR PAPERS

Special Issue of *Production and Operations Management* on  
INFORMATION AND INCENTIVE ISSUES IN SUPPLY CHAINS

### Editors:

Anil Arya, Ohio State University, Arya\_4@fisher.osu.edu

Stephen Gilbert, University of Texas, Steve.Gilbert@mcombs.utexas.edu

Brian Mittendorf, Ohio State University, Mittendorf\_3@fisher.osu.edu

The formation and coordination of supply chains are prominent and evolving areas of research in a variety of fields, including accounting, economics, finance, marketing, and operations management. Recent years have seen an increasing emphasis, both among practitioners and academics, on issues of information and incentives in supply chains. This is manifest in, for example, the use of increasingly sophisticated performance measurement and evaluation tools, expanded information sharing, and the discussions and debates surrounding reward schemes. In light of the importance of such issues and in the interdisciplinary spirit of supply chain research, the aim of this special issue is to bring a variety of perspectives and methodologies together to foster a broad view of how information and incentives affect and are affected by supply relationships.

### Submission Guidelines

Papers should be submitted using the POM Manuscript Central Site at <http://mc.manuscriptcentral.com:80/poms> directed to the Guest (Department) Editor Anil Arya. The submission deadline for the special issue is **April 15, 2012**.

Submitted papers will be reviewed according to the standards of *Production and Operations Management*. For additional information, please see

[http://www.poms.org/journal/author\\_instructions/](http://www.poms.org/journal/author_instructions/). The publication of the special issue is planned for around **June 2013**.

### **About Production and Operations Management**

The mission of *Production and Operations Management* is to serve as the flagship research journal in operations management in manufacturing and services. The journal publishes scientific research into the problems, interest, and concerns of managers who manage product and process design, operations, and supply chains. It covers all topics in product and process design, operations, and supply chain management and welcomes papers using any research paradigm. *Production and Operations Management* is among the Financial Times Top 45 Journals and among Business Week's 20 Premier Journals.
