CONFERENCE THEME

BIG DATA ANALYSES, INFORMATION SYSTEMS IN AUDITING & ACCOUNTING

We invite all academic and business professionals interested in presenting their research and ideas to the conference to submit abstracts. With the growing interest in the level of transparency both for firms and for governments the availability of more data makes audit of all activities a real possibility. We invite papers that explore both the possibility of greater transparency and the implications this will have on the audit. All abstracts will be reviewed for their relevancy for the conference theme and for possible publication. Each abstract will have two peer reviews. At least one author for all accepted papers must attend the conference and be prepared to present and discuss their work.
