Institute of Management Accountants  
Annual Conference and Exposition  
Call for Submissions - Applied Research Track

**EXTENSION FOR ROUNDTABLE SESSION ONLY**

IMA invites academics and practitioners to submit manuscripts and/or presentation proposals for the Applied Research Track of IMA’s Annual Conference & Exposition. This track will consist of a poster session, an **Applied Research Roundtable session**, and a Research Lab. The goal of this track is to help bridge the gap between academics and management accounting professionals while contributing to the development of knowledge in the profession.

**Applied Research Roundtable Session**
The Applied Research Roundtable session is a forum designed specifically for research projects focused on business application or education. A major objective of the roundtable session is to provide academics with the opportunity to receive feedback on research projects they are pursuing and to serve as a source for new research ideas and resources.

Practitioners can learn about projects currently being pursued by management accounting researchers, obtain new practice insights, and share their professional experiences in relation to the projects presented.

Papers presented at the roundtable will be published in the Proceedings of the Business & Educators’ Roundtable, IMA Annual Conference and Exposition.

All accepted presenters will receive a choice of 1-day pass **OR** 30% off full conference registration.

**The roundtable session will be held June during the IMA Annual Conference**

**Submissions**
Submissions should be sent electronically to research@imanet.org. All submissions should include a cover letter that indicates your name, academic affiliation, telephone number, and email address.

Please note that your submission is for the **Applied Research Roundtable session.**

**Submission Due: February 10.**
