Workshop: Impact of Artificial Intelligence in Auditing

Presenters: Dr. Felipe Janica, Senior Client Executive, EY; Sat Dutta, Technology Audit leader for EY LATAM

Brief Description

This workshop will address the impact of artificial intelligence on the auditing profession.

Long Description:

In today's ever-evolving business landscape, the integration of artificial intelligence (AI) is revolutionizing the field of auditing. As auditors, understanding the implications and opportunities of AI is crucial to staying relevant and effective in your profession. This CPE workshop is designed to provide accounting professionals with comprehensive insights into the impact of AI on auditing processes and how to harness its potential for enhanced audit quality.

Format/Structure:

The workshop will provide participants with background information about the effect of artificial intelligence on the audit profession. Participants will learn how AI has created opportunities for auditors and the benefits of using AI tools to improve audit quality.

The workshop will be interactive, and there will be brief demonstrations of some AI auditor tools.

Intended Audience:

This is a topic that applies to all areas of accounting. Anyone interested in learning more about artificial intelligence will benefit from this workshop. The workshop is intended for the beginner level.

Prerequisites:

None

Advance Preparation:

None

Learning Objective:

1. Gain a clear understanding of AI and its applications in auditing.
2. Learn how to implement AI tools to streamline audit processes.
3. Explore real-world examples of AI integration in auditing.

4. Improve efficiency and understand the ethical considerations when using AI in auditing.
5. Strategies for including sustainability reporting in accounting curricula and courses.

Field of Study: Audit

Program Level: Basic
