The Symposium brings top audit scholars together to discuss interesting, current audit research. Papers should address audit research questions that advance our current knowledge and that employ any rigorous research method. Papers on all audit and assurance-related topics are welcome and high-quality, innovative topics, data, subjects, and methods are particularly encouraged.

The 5th Illinois Audit Doctoral Consortium will include presentations from two top audit scholars and research presentations from three to four doctoral students. Consortium attendees are invited to stay for the Symposium.
