

Journal of International Accounting Research

Editorial Policy

The *Journal of International Accounting Research* publishes articles that increase our understanding of the development and use of international accounting and reporting practices or attempt to improve extant practices. International accounting is broadly interpreted to include the reporting of international economic transactions; the study of differences among practices across countries; the study of interesting institutional and cultural factors that shape practices in a single country but have international implications; and the effect of international accounting practices on users. The Journal has a diverse readership and is interested in articles on auditing, financial accounting, managerial accounting, systems, tax, and other specialties within the field of accounting. The Journal is open to research using a wide variety of research methods, including empirical-archival, experimental, field studies, and theoretical. The importance of the findings and the rigor of the analysis are the factors that determine acceptability. The Journal may include sections for Notes (shorter articles), Commentaries, and Book Reviews.

All manuscripts are sent to two reviewers, although one or more additional reviewers are consulted in some instances. Reviews are double-blind (i.e., to both the author and reviewer). A strong effort is made to complete the initial review within two to three months. The review process is intended to provide constructive comments that improve the quality of manuscripts by focusing on critical issues. The editorial team recognizes that the nuances of a paper are better left to the authors.

SUBMISSION OF MANUSCRIPTS

The following guidelines should be followed for submitting manuscripts:

1. Manuscripts are submitted using the Manuscript Submission and Peer Review System, at <https://www.editorialmanager.com/jiar>. The site contains detailed instructions regarding the preparation of files for submission. To ensure anonymous review, the title page is submitted as a separate file from the manuscript text.
2. Manuscripts under consideration by another journal or other publisher should not be submitted. The submitting author will be asked to verify this during the web-based submission process.
3. For manuscripts that report on field surveys or experiments: Please ensure that reporting descriptive statistics, models, and tests of hypotheses is complete. For experimental papers, this would generally include: (1) reporting standard deviation and cell sizes in any tables of means; (2) including degrees of freedom along with any reported test statistics that have degrees of freedom, whether in the tables, footnotes, or text; and (3) ensuring ANOVA, MANOVA, ANCOVA, etc. tables are complete, including all estimated terms, including the error term, along with the associated degrees of freedom. Note that if test statistics and associated degrees of freedom are reported in the tables, then authors need not repeat this material in the text. For example, authors could provide only the p-values for effects (tests) of interest in the text, if desired. If the additional documentation (e.g., questionnaire, case, interview schedule) is sent as a separate file, then all information that might identify the author(s) must be deleted from the instrument.
4. Manuscripts that report experiments utilizing human subjects must verify approval by the institution at which the experiment took place. Notation of approval should be made within the manuscript. In addition, the submitting author will be asked to verify approval during the web-based submission process. Click [here](#) for more information on the American Accounting Association's policy on Human Subjects Research.
5. Authors are responsible for recognizing and disclosing any conflict of interest that could be perceived to bias their work. Conflict of interest disclosures include, but are not limited to, grants

or research funding, employment, affiliations, honoraria, stock options/ownership, royalties, consultancies, inventions, and patents. Authors will be asked to provide any potential conflicts of interest during manuscript submission.

6. The nonrefundable submission fee of \$100.00 for members and \$250.00 for nonmembers of the AAA is payable by credit card (VISA, MasterCard, or American Express only). The payment form is available online at: <https://my.aaahq.org/Shop/Product-Catalog>. If you are unable to pay by credit card or have any questions, please contact the AAA Member Services Team at (941) 921-7747 or info@aaahq.org.
7. Revisions should be submitted within 12 months from the request, otherwise they will be considered new submissions.

REVIEW PROCESS

The review process consists of the following:

1. The editor reviews the submitted manuscript for proper format and consistency with the mission of the journal. The author(s) is notified if the manuscript is deemed inappropriate for further consideration.
2. Manuscripts that pass the initial review are sent to an associate editor and a minimum of two reviewers for formal review.
3. The editor evaluates comments and recommendations of the reviewers and the associate editor and informs the author(s) of the decision regarding the publication of the manuscript (reject, accept, or revise/resubmit). The editor's decision and comments, without identifying information, are forwarded to the associate editor and reviewers.
4. Requested revisions are returned to the same reviewers. In addition to the revised manuscript, the author(s) should submit responses to the reviewer comments that restate the comments and identify how and where the comment is addressed in the revision.
5. The process will continue as described above until a final publication decision is made.
6. Consistent with our Publications Ethics policy on plagiarism (for the full version, please see: <http://aaahq.org/Portals/0/documents/about/Policies&ProceduresManual/PlagiarismPolicy.pdf>), all articles are automatically processed through CrossCheck prior to publication to identify text taken from published and unpublished works, print or digital, that is not properly cited or quoted.

The review, as outlined above, is an overview of the actual process. The editor may, in some circumstances, vary this process at his or her discretion. Through its constructive and responsive editorial procedures, the journal aims to render research efforts relevant and rewarding for all concerned.

CONFLICT OF INTEREST

To promote the objective handling of papers under review, *JJAR* prohibits Editors, and takes steps to prevent reviewers, from handling papers by authors with whom they have a conflict of interest. Because a variety of circumstances can result in a loss of objectivity with respect to a particular paper, judgment is necessary to identify conflicts of interest. However, a conflict of interest is presumed to exist when an Editor or reviewer: (1) is an author of the paper; (2) has a personal relationship with an author that prevents the Editor or reviewer from being objective; (3) chaired an author's dissertation committee or an author chaired the dissertation committee of the Editor or reviewer; (4) works at the same institution as an author, or worked at the same institution within the last five years; or (5) has co-authored a paper with an author. An Editor also is presumed to have a conflict of interest with a paper when that Editor had editorial decision rights on a previous version of the paper at another journal.

When an Editor has a conflict of interest with a paper, the Senior Editor will assign a non-conflicted Editor to handle the paper unless the Senior Editor is an author of the paper, in which case a non-conflicted Editor will assign a non-conflicted Editor to handle the paper. If necessary, an ad hoc Editor will be assigned to handle the paper. The conflicted Editor will have no access to *JJAR* information about the paper. Because of the double-blind review process, it is primarily the responsibility of the Senior Editor and other Editors to identify conflicts of interest. Should a reviewer suspect a conflict of interest, it is the reviewer's responsibility to alert the Senior Editor or another Editor to the potential conflict. If a conflict arises during the review process, the Senior Editor will oversee a change in Editor or reviewers, as appropriate.

ADDITIONAL INFORMATION

Keywords

The abstract is to be followed by four keywords that will assist in indexing the paper.

Comments

Comments on articles previously published in the *Journal of International Accounting Research* will be sent to two reviewers at the same time. The first reviewer will be the author of the original article being subjected to critique. If substance permits, a suitably revised comment will be sent to a second reviewer to determine its publishability in the *Journal of International Accounting Research*. If a comment is accepted for publication, the original author will be invited to reply. All other editorial requirements, as enumerated above, also apply to proposed comments.
