INTRODUCTION

Accounting Horizons is one of three association-wide journals published by the American Accounting Association (AAA). This journal seeks to bridge academic and professional audiences with articles that focus on accounting, broadly defined, and that provide insights pertinent to the accounting profession. The contents of *Accounting Horizons*, therefore, should interest researchers, educators, practitioners, regulators, and students of accounting. Accordingly, papers submitted for publication must address subjects that appeal to these readers and must be written in a style that communicates effectively across these diverse groups. Because of the broad focus of this journal, the scope of acceptable manuscripts is also broad. Papers may deal with any aspect of accounting, including—but not limited to—the following topics:

- Accounting ethics
- Assurance services
- Data analytics and related emerging technologies
- Diversity, Equity, and Inclusion
- Enterprise risk management
- Financial reporting
- Impact of accounting on organizations and individual behavior
- Accounting information systems
- Managerial accounting
- Regulation of the profession and related legal developments
- Sustainability, environmental, social, and governance reporting
- Taxation

The editor welcomes submissions of manuscripts that address innovative topics and concerns. One of the main objectives of *Accounting Horizons* is to establish a dialogue—a bridge of ideas—between accounting academics and the business community. From time to time, the editor will commission thought pieces, memorials, historical and other reviews, editorials, and original research relevant to current issues and the future of the accounting profession. Ideas for such articles may come from the associate editors, the Executive Committee of the AAA, or other sources. In addition, reviews of contemporary professional literature, commentaries on practice, and reports of current events will appear when developments warrant.

All submitted articles processed for publication will be peer-reviewed. Articles that address an especially timely subject will be evaluated and refereed on an expedited basis to facilitate prompt publication if accepted.

Scott A. Taub is a Managing Director of Financial Reporting Advisors, LLC. Based in Chicago, FRA provides consulting services related to accounting and financial reporting, offering clients an unbiased assessment of the accounting literature as applied to their situation. Mr. Taub has been a member of many professional committees including the FASB's Valuation Resource Group, the IFRS Interpretations Committee, and the FASB/IASB Joint Transition Resource Group for Revenue Recognition. Mr. Taub spent six and a half years as a Professional Accounting Fellow, Deputy Chief Accountant, and Acting Chief Accountant at the Securities and Exchange Commission (SEC). He was responsible for resolution of practice issues, rulemaking (including the implementation of the Sarbanes-Oxley Act), oversight of the FASB, and regulation of auditors. Mr. Taub represented the SEC before accounting standard-setters, the U.S. Congress, and many other bodies. He also chaired the accounting committee of the International Organization of Securities Commissions. Mr. Taub spent three years in Arthur Andersen's Professional Standards Group, consulting with clients and developing interpretive guidance for Andersen on a wide variety of accounting and reporting issues. Before that, he was an auditor for seven years. Mr. Taub is the author of CCH's *Revenue Recognition Guide* and CCH's *Financial Instruments* guide. He was the primary author of several SEC reports and publications, including several reports to Congress, and wrote a periodic column for *Compliance Week* on financial reporting developments for nine years. Mr. Taub received an economics degree in 1990 from the University of Michigan.

Kristy L. Towry

Emory University, Goizueta Business School, Atlanta, GA, USA

Kristy L. Towry is John and Lucy Cook Chair and Professor of Accounting at Emory University's Goizueta Business School. Professor Towry joined the Goizueta Business School faculty in 2002 after receiving her Ph.D. from The University of Texas at Austin. She has extensive experience in managerial accounting and finance, including a number of positions at Exxon and Compaq. Professor Towry's research relates to the use of accounting information for managerial decision making, with a focus on managerial control systems and financial incentives. Her research, based on the experimental method, blends theory from economics, psychology, and other social sciences to provide insights into accounting issues. She has published in *The Accounting Review*, *Contemporary Accounting Research*, *Review of Accounting Studies*, *Proceedings of the National Academy of Sciences*, and other accounting and economics journals.

Albert Tsang

Southern University of Science and Technology, SUSTech Business School, Shenzhen, Guangdong, China

Professor Albert Tsang is the recipient of the 2022 Distinguished Contribution to Accounting Literature Award awarded by the American Accounting Association for his contribution to academic research in corporate social responsibility (CSR) and/or environment, social, and governance (ESG) during the past 15 years. Professor Tsang is also the recipient of the CGIR (*Corporate Governance: An International Review*) Best Paper Award 2021 and 2022 for his papers on corporate governance and CSR. Two of his CSR studies have been ranked worldwide number 1 and 9, respectively in terms of citations among all financial archival papers published since 2010. Professor Tsang initiated research works examining the capital market implication of CSR reporting since 2008 after he graduated with a PhD degree in accounting from the University of Texas at Dallas. Currently, he is a Chair Professor of Accounting at SUSTech Business School of Southern University of Science & Technology, China. Previously, he was a tenured faculty member in Schulich School of Business at York University

Shankar Venkataraman

Bentley University, Department of Accountancy, Waltham, MA, USA

Shankar Venkataraman is an associate professor of accounting at Bentley University in Waltham, MA. Before he received his Ph.D. in Accounting from The University of Texas at Austin, he worked for ten years in banking and consulting. His research uses experiments to understand how individuals make decisions using accounting information. He is particularly interested in the impact of financial disclosures and policies on investors' and managers' decision-making processes. His research has been published in *The Accounting Review*, *Journal of Accounting Research*, *Review of Accounting Studies*, *Journal of Accounting and Public Policy*, *Journal of Behavioral and Experimental Finance*, and *Accounting Horizons*.

David A. Wood

Brigham Young University, Marriott School of Business, School of Accountancy, Provo, UT, USA

CITATION INDICES

Accounting Horizons is a highly respected journal in the accounting and economics categories. This section provides data on rankings drawn from Scopus (Elsevier, 2022), presents citation counts from Elsevier's new CiteScore, compares impact factors from the Social Science Citation Index (Clarivate Analytics, 2022), reviews the Top 10 Google Scholar journals in the Accounting and Taxation subcategory of Business and Economics, and includes international journal listings and ratings from the most recent data available.

Scopus Rankings

An important measure of the quality of a journal is to understand how its intellectual contributions are valued by measuring the extent of citations made to papers published in that journal. Elsevier's Scopus database of abstracts and citations of peer-reviewed papers has 50m records in more than 22,000 titles published by 5,000 publishers (<http://www.elsevier.com/online-tools/scopus>). Scopus provides a foundation for new journal metrics that have become increasingly influential in recent years (<http://www.journalmetrics.com>). Important metrics based on Scopus include Source-Normalized Impact per Paper (SNIP) and SCImago Journal Rank (SJR). Journal citation metrics based on Scopus are increasingly seen by many senior university administrators as a means of normalizing the differences in publishing patterns between disciplines.

The key aspect of SNIP is to measure citation impact by "normalizing" citation values for the radically different patterns of citation between disciplines. SNIP also counters the various manipulations of citation rankings. The summary of SNIP is:

- "Takes a research field's citation frequency into account
- Considers immediacy—how quickly a paper is likely to have an impact in a given field
- Accounts for how well the field is covered by the underlying database
- Counters any potential for editorial manipulation" (<http://www.journalmetrics.com>)

The key aspect of SJR is the recognition that not all citations are equal. A citation in a more influential journal should count more than a citation in a less influential journal. The summary of SJR is:

- "Is weighted by the prestige of the journal, thereby 'leveling the playing field' among journals
- Eliminates manipulation: the only way to raise the SJR ranking is publish in more reputable journals
- 'Shares' a journal's prestige equally over the total number of citations in that journal
- Normalizes for differences in citation behavior between subject fields" (<http://www.journalmetrics.com>)

Table 4 shows the SNIP and SJR rankings for 2019 to 2022 (most recent data) with comparable data for AAA peers, as well as those in the accounting and finance disciplines.

CiteScore

In 2016, CiteScore was added to the Scopus metrics. CiteScore measures the citations on articles published in the previous three years. All article types are counted. Scopus metrics now include Source Normalized Impact per Paper (SNIP), SCImago Journal Rank (SJR), and citation and document counts and percentage cited (CiteScore). Another way of looking at this is SNIP is article impact, SJR is the journal impact, and CiteScore is a simplified view of the journal's citation analysis. The following images show the CiteScore trend for *Horizons*, and the CiteScore table lists the CiteScore for each journal in the AAA collection indexed in Scopus.

WEB OF SCIENCE: SOCIAL SCIENCE CITATION INDEX

The *Journal Citation Report (JCR)*, Clarivate Analytics, formerly Thomson Reuters) provides data that rank, evaluate, categorize, and compare journals that are indexed in the Social Science Citation Index (SSCI). The impact factor (IF), one of the data points of SSCI, is the industry measure of the frequency with which an article in a journal has been cited over a particular period. The annual *JCR* impact factor is a ratio between citations and recent citable items published. Thus, the impact factor of a journal is calculated by dividing the number of current year citations to articles published in that journal during the previous two years (*JCR*, 2022).
