Workshop #02: 31st Annual Research Workshop on Strategic and Emerging Technologies in Accounting, Auditing, and Tax

Accounting, Auditing, Tax – 7.8 CH

Long Description:

Papers are welcome on any topic relating to strategic and emerging technologies applied to any area of accounting, applying any research methodology including design science (DSR). Examples of research presented at recent workshops: blockchain, text/data analytics, REA, continuous assurance, fraud detection, evidential reasoning, information modeling, genetic programming, neural networks, natural language processing, intelligent databases, intelligent agents and object oriented computing, XML, and XBRL.

Format/Structure:

Working papers that have not been accepted for publication are eligible for submission. Early stage research and doctoral proposals from doctoral students are particularly encouraged. Authors from anywhere in the world are welcome. Papers will be considered for the SET Section Journal, Journal of Emerging Technologies in Accounting (JETA), at the option of the author. Please indicate if you would like your paper to be considered for JETA publication. Authors of accepted papers are expected to pay associated registration fees. The registration fees are waived for doctoral members of the SET section presenting their research.

Intended Audience:

Primarily accounting academics and Ph.D. students.

Prerequisites:

None

Advance Preparation:

None

Learning Objective:

Have insights and details on the most current emerging technologies in accounting and the assurance fields. Opportunity to network with thought leaders in the fields of AIS and strategic and emerging technologies.

Field of Study: Accounting

Program Level: Basic
